

Why Banknet?

Five separate divisions inclusive of the global banking, cryptocurrency lending and real estate platform, a global insurance operator and a currency exchange accompanied by free procurement of five different currencies.

Reward Distribution Program

The official token (BKU) holders are subject to rewards – 25 per cent of the total proceeds of the BST tokens - in the form of the BST token, itself. The Market Price Stabilization Index of this platform allows to tackle risk associated with the coin by releasing unused funds to avoid destabilization and volatility.

Ample Potential

The cryptocurrency exchange platform alone has the potential of channelizing a market capitalization worth \$1.3 billion. The worth multiplies when we speak of the company as a whole.

Banknet: Transforming Real World Assets On The Blockchain

Success Model

The ultimate integration and combination of financial products and services with tokenization of real estate asset could turn Banknet in due time to be a giant corporation with unimaginable market capitalization.
